

Business Owners Advisory Group

Overview

In 2012, Pioneer Business ventures formed a virtual group of business owners who want to improve their business. Our mission is to provide a time-efficient and cost-effective group of business owners to support one another with goal achievement. Group members also benefit privately from group facilitator John McAdam, a former owner of multiple businesses, hired CEO, author, and instructor. Our ideal business owner member is in charge of a private company employing 10 to 1,000 full-time people. This premium peer-group encompasses the collective business experience of business owner / CEO members to share experiences, learn from each other, solve business problems, and achieve goals.

Member Identified Benefits

- More clients for revenue growth
- Actionable understanding of financial statements resulting in expense control efficiencies
- Higher value and less stressful liquidity events
- Better hires, better teams, and better workplaces
- Receiving one-on-one action planning between meetings to increase accountability to achieve your goals

Testimonials

"I run a mid-size company, and time is at a premium. Our Business Owners Advisory Group is very time-efficient for me. I take an hour or two from my work month and treat myself to some professional development with a small group of business owners around the country. The group and one-on-one sessions with John help me work on rather than in my business, enabling me to view the company I run from different strategic angles. We recently set a sales record as a result of our work together." Jack, TX

"We exited at \$12 Million, and it wasn't as hard as I thought!"
John, East coast transportation company

"You and the group help me understand where my money is going."
Janine, Health care service provider, Greater Milwaukee

"You helped us grow from \$4.5 Million to \$17 Million." Warren, NYC commercial construction company
